PROFESSIONAL SUMMARY

Software Developer with 8+ years of experience building production-grade systems in high-stakes, regulated industries — including banking, capital markets, insurance, and telco. Proficient across the full stack (NestJS, NextJS, React/React Native, Spring Boot, PostgreSQL) and comfortable owning work end-to-end: from data modeling and system design to deployment and maintenance. Experienced collaborating with product owners, backend teams, and business stakeholders in agile environments to translate complex requirements into scalable, maintainable solutions. Known for adaptability across tech stacks and delivering consistently in demanding, compliance-heavy domains.

PROFESSIONAL EXPERIENCE

Freelance, Self Employee | Jan 2026 – Present

- Delivering full-cycle web application projects independently for multiple clients, covering requirements gathering through production deployment.
- Working across diverse stacks including NestJS, Spring Boot, Go (Echo), Next.js, and Google APIs to build custom dashboard and business tools tailored to client needs.

Bank Maybank Indonesia — Web FE Developer, Internet Banking | Oct 2024 – Nov 2025

- Developed core internet banking features supporting 13-currency multicurrency accounts with real-time IDR conversion, integrated across all major transfer types (own account, interbank, FX, RTGS, SKN, VA) and deposit creation.
- Collaborated in an agile team with Product Owner, Backend Engineers, and Core Banking System stakeholders to deliver MVP features on schedule.
- Built responsive, production-grade UI using ReactJS within a regulated banking environment with strict compliance and quality standards.

Telkom Indonesia — Full Stack Developer, Partnership Platform | Jul 2021 – Sep 2024

- Designed and developed a web-based partnership management portal covering the full contract lifecycle: initiation, document creation, multi-level approval workflows, monitoring, and archiving.
- Built document generation modules for business cases, official letters, minutes of meeting, and legal contracts — reducing manual document handling across departments.
- Implemented role-based approval workflows to enforce governance, compliance, and auditability across business units.
- Designed role-based dashboards for diverse stakeholders including business owners, legal, management, and operations teams.
- Developed automated notification systems for document status updates, approval events, and contract lifecycle milestones.
- Contributed to system architecture decisions and data modeling to support long-term scalability of contract management features.

Ecomindo Sarana Cipta — Full Stack Developer | Oct 2017 – Feb 2021

Bursa Efek Indonesia (IDX)

- Enhanced the Centralized Trading Platform with features for trade correction, cancellation, automated fee calculation, and Excel-based reporting — improving operational accuracy for daily trading operations.

BTPN

- Built and optimized a pension fund tracking platform, integrating it with the bank's core system and improving production stability through ongoing performance tuning.

Prudential (PLAI)

- Developed multi-framework mobile applications (Ionic, AngularJS, ReactJS, React Native) to digitize sales operations for nationwide insurance agents.
- Integrated real-time quotation data from core systems, reducing manual steps in the agent sales workflow.

EDUCATION

Gunadarma University — Bachelor's Degree, Computer System | *Sep 2013 – Sep 2017*

GPA: 3.30 | Thesis: Surveillance System with Object Detection

TECHNICAL SKILLS

Backend: NodeJS/NestJS, Java/Spring Boot, Go (Echo)

Frontend: ReactJS/NextJS, React Native, Tailwind CSS

Databases: PostgreSQL, MongoDB, Redis, IBM DB2

Infrastructure & Tools: Docker, OpenShift, k3s, Jenkins, Kafka, S3/MinIO, Datadog, Sonar, Git

Methodology: Agile (Scrum), Waterfall, Azure DevOps, Jira, Confluence

AI-Assisted Dev: GitHub Copilot (Agent Mode)
